

YOU NAME IT. U-ADD LETS UAVs BRING IT.

UAV mission capabilities just took off.

With Textron Defense Systems' new multi-purpose GPS guided U-ADD (Universal Aerial Delivery Dispenser), you can precisely deploy many kinds of lethal and non-lethal payloads and other cargo right on target.

And from high altitudes.

U-ADD brings the USAF, Army and Navy added value now.

Because now, whatever you need, UAVs can really bring it on.
